

Information sheet on the recognition of academic achievements abroad

- Without exceptions, achievements are recognised to the extent (ECTS) awarded by the foreign university,
- At the TUHH, upgraded work completed at the host university can only be credited without a grade.

Groups of completed work must be assigned to a specialized block:

- Individual services cannot be split between two or more blocks
 - There is no 1:1 recognition of achievements at the course level, with the exception of compulsory courses.
- A language course with a maximum of 6 ECTS is recognised.
 - A prerequisite for the recognition of Master's thesis written abroad is the evaluation of the thesis by a supervisor from the TUHH.

After returning home, it is necessary for the recognition to enter the courses taken abroad with German and English translations in Table F of the Examination Office.
